

**BIOMASS CONSUMPTION IN RURAL AREAS: THE  
VULNERABILITY AND RESILIENCE OF LOCAL  
COMMUNITIES IN THE FACE OF FOREST PROTECTION  
IN AND AROUND MABIRA FOREST RESERVE UGANDA**

Paul Isolo Mukwaya  
Assistant Lecturer  
Department of Geography,  
[mukwaya@arts.mak.ac.ug](mailto:mukwaya@arts.mak.ac.ug)

**Makerere University P.O.BOX 7062  
Kampala Uganda  
[www.makerere.ac.ug/geography](http://www.makerere.ac.ug/geography)**

**Issue – How can a continuous supply of biomass especially fuel wood be maintained while enhancing the environmental services of Mabira forest reserve?**

**LIVELIHOODS**

**ENVIRONMENT**

# Outline of presentation

 Introduction

 Energy situation in Uganda

 Mabira forest reserve

 Tenure rights and access to fuel wood

 Fuel wood and Livelihoods

 Resilience of rural communities

 Energy governance and sector reforms

 The Mabira Forest Management Plan

 Other energy sector reforms/approaches

 Layers of energy provision governance

 Conclusion

# Introduction

- ✍ **Level of development also measured by type of energy consumed**
- ✍ **People desire the energy services that energy can enable**
- ✍ **Energy not explicit in the MDGs**
- ✍ **Maintaining access to reliable and affordable supplies of energy is a big challenge**
- ✍ **Little recognition of fuel wood shortages in many countries**
- ✍ **Main source of fuel wood are biodiversity reserves**

# Energy sector in Uganda

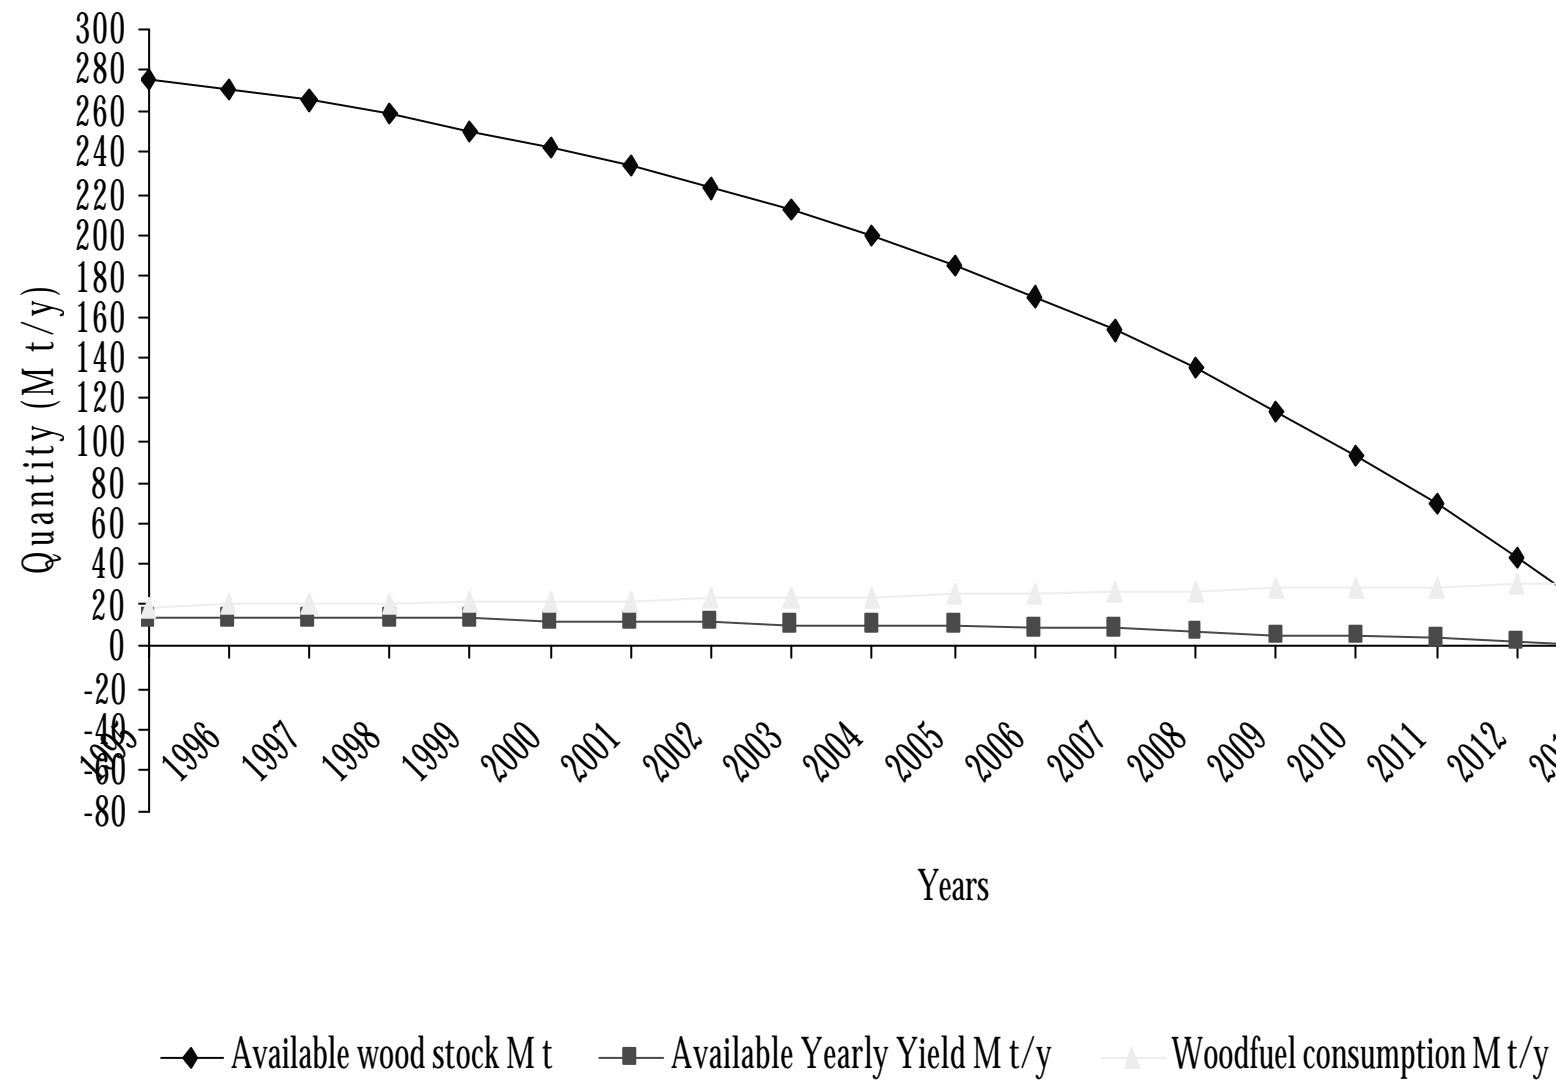

- ✍ Biomass represents 93% of the national energy balance
- ✍ Lowest per capita consumption of commercial energy in Africa
- ✍ Energy demand growing
- ✍ Oil products imported (100%)
- ✍ Renewable energies are abundant but not largely disseminated
- ✍ Electricity load shedding and low electrification rate 9% constrain the rural development

## Biomass energy flows at national level (1995)

	Category	Flow (,000 t/year)
<b>Supply</b>	Trees above ground	14460.1
	Dung (dry volatile solids)	236.2
	Crop residues	1733.5
	<b>Total biomass supply</b>	<b>16429.8</b>
<b>Consumption</b>	Charcoal	3118
	Fuel wood (household)	13447
	Fuel wood (commercial)	1907
	Fuel wood (industrial)	913
	<b>Total fuel wood consumption</b>	<b>19385</b>
	Residue consumption	850
	<b>Total biomass consumption</b>	<b>20235</b>
<b>Balance</b>	<b>Supply - consumption</b>	<b>-3805.2</b>

# Available wood stock in Uganda

# Mabira forest reserve

## 2002

## 1976

# Mabira contd.

✍ **Surrounded by four counties in South Central Uganda**

✍ **17,314 households (2002)**

✍ **Gazetted as forest reserve in 1932**

✍ **Total area – 30,310 hectares (306 km sq.) with boundary length of 298 km**

✍ **Subjected to multiple sources of stress**

✍ **Descriptive study largely looked at 337 households randomly selected from the 6 parishes \* 3 enclave communities and 3 around the reserve**

# Tenure regimes and access to fuel wood

	Management regime	Fuel wood access rights
<b>Pre colonial period</b>	<b>Communal and open access basis</b>	<b>Fuel wood collection was free for all</b>
<b>Colonial period (1898 – 1961)</b>	<ul style="list-style-type: none"> <li>✍ <b>Network of forest reserves was created</b></li> <li>✍ <b>No involvement of local communities</b></li> <li>✍ <b>Attention paid to forestry for industrial purposes</b></li> </ul>	<ul style="list-style-type: none"> <li>✍ <b>Access rights were transferred to industrial, commercial and the urban sector</b></li> <li>✍ <b>Dislocation of local people from land</b></li> </ul>
<b>Post independence period (1962 – 1971)</b>	<ul style="list-style-type: none"> <li>✍ <b>Centralization of forest reserves</b></li> <li>✍ <b>Strong command and control regime</b></li> </ul>	<ul style="list-style-type: none"> <li>✍ <b>Maximization of timber resources</b></li> <li>✍ <b>Alienation of local people</b></li> </ul>

# Regimes contd.

<p><b>Military dictatorship period (1972 – 1985)</b></p>	<ul style="list-style-type: none"> <li>✍ <b>No effective management of forests</b></li> <li>✍ <b>Political and economic instabilities</b></li> <li>✍ <b>Forests were severely encroached on and destroyed</b></li> </ul>	<ul style="list-style-type: none"> <li>✍ <b>Encroachers moved into the forest reserve</b></li> <li>✍ <b>No sustainable management of forest reserves</b></li> <li>✍ <b>Government war on poverty gave permits for local people to enter the forest</b></li> </ul>
<p><b>Decentralization period (1987 – to date)</b></p>	<ul style="list-style-type: none"> <li>✍ <b>Movement from centralization to decentralization back to centralization</b></li> <li>✍ <b>Removal of encroachers</b></li> <li>✍ <b>Pursuit of collaborative management with local communities</b></li> </ul>	<ul style="list-style-type: none"> <li>✍ <b>Regaining control of forests involved removal of forest encroachers</b></li> <li>✍ <b>Involvement of local communities</b></li> <li>✍ <b>Collaborative management techniques unclear</b></li> </ul>

# Stakeholder perceptions of Mabira forest

<b>Dimensions of discordance</b>	<b>Private sector</b>	<b>Government</b>	<b>Household /Community</b>
<b>Concept of Mabira Forest</b>	<b>Commodity (mine)</b>	<b>Mine in public interest</b>	<b>Heritage (ours)</b>
<b>Objective</b>	<b>Timber, sport, recreation, scenery</b>	<b>Nature – ecotourism</b>	<b>Livelihood</b>
<b>Construct</b>	<b>Away</b>	<b>Away</b>	<b>Home</b>
<b>Spatial characteristic</b>	<b>Absentee</b>	<b>Absentee</b>	<b>Resident</b>

# Pattern of flow of wood in Mabira Communities

**WOOD RESOURCE BASE**  
Mabira Forest Reserve - Private  
lands and woodlots

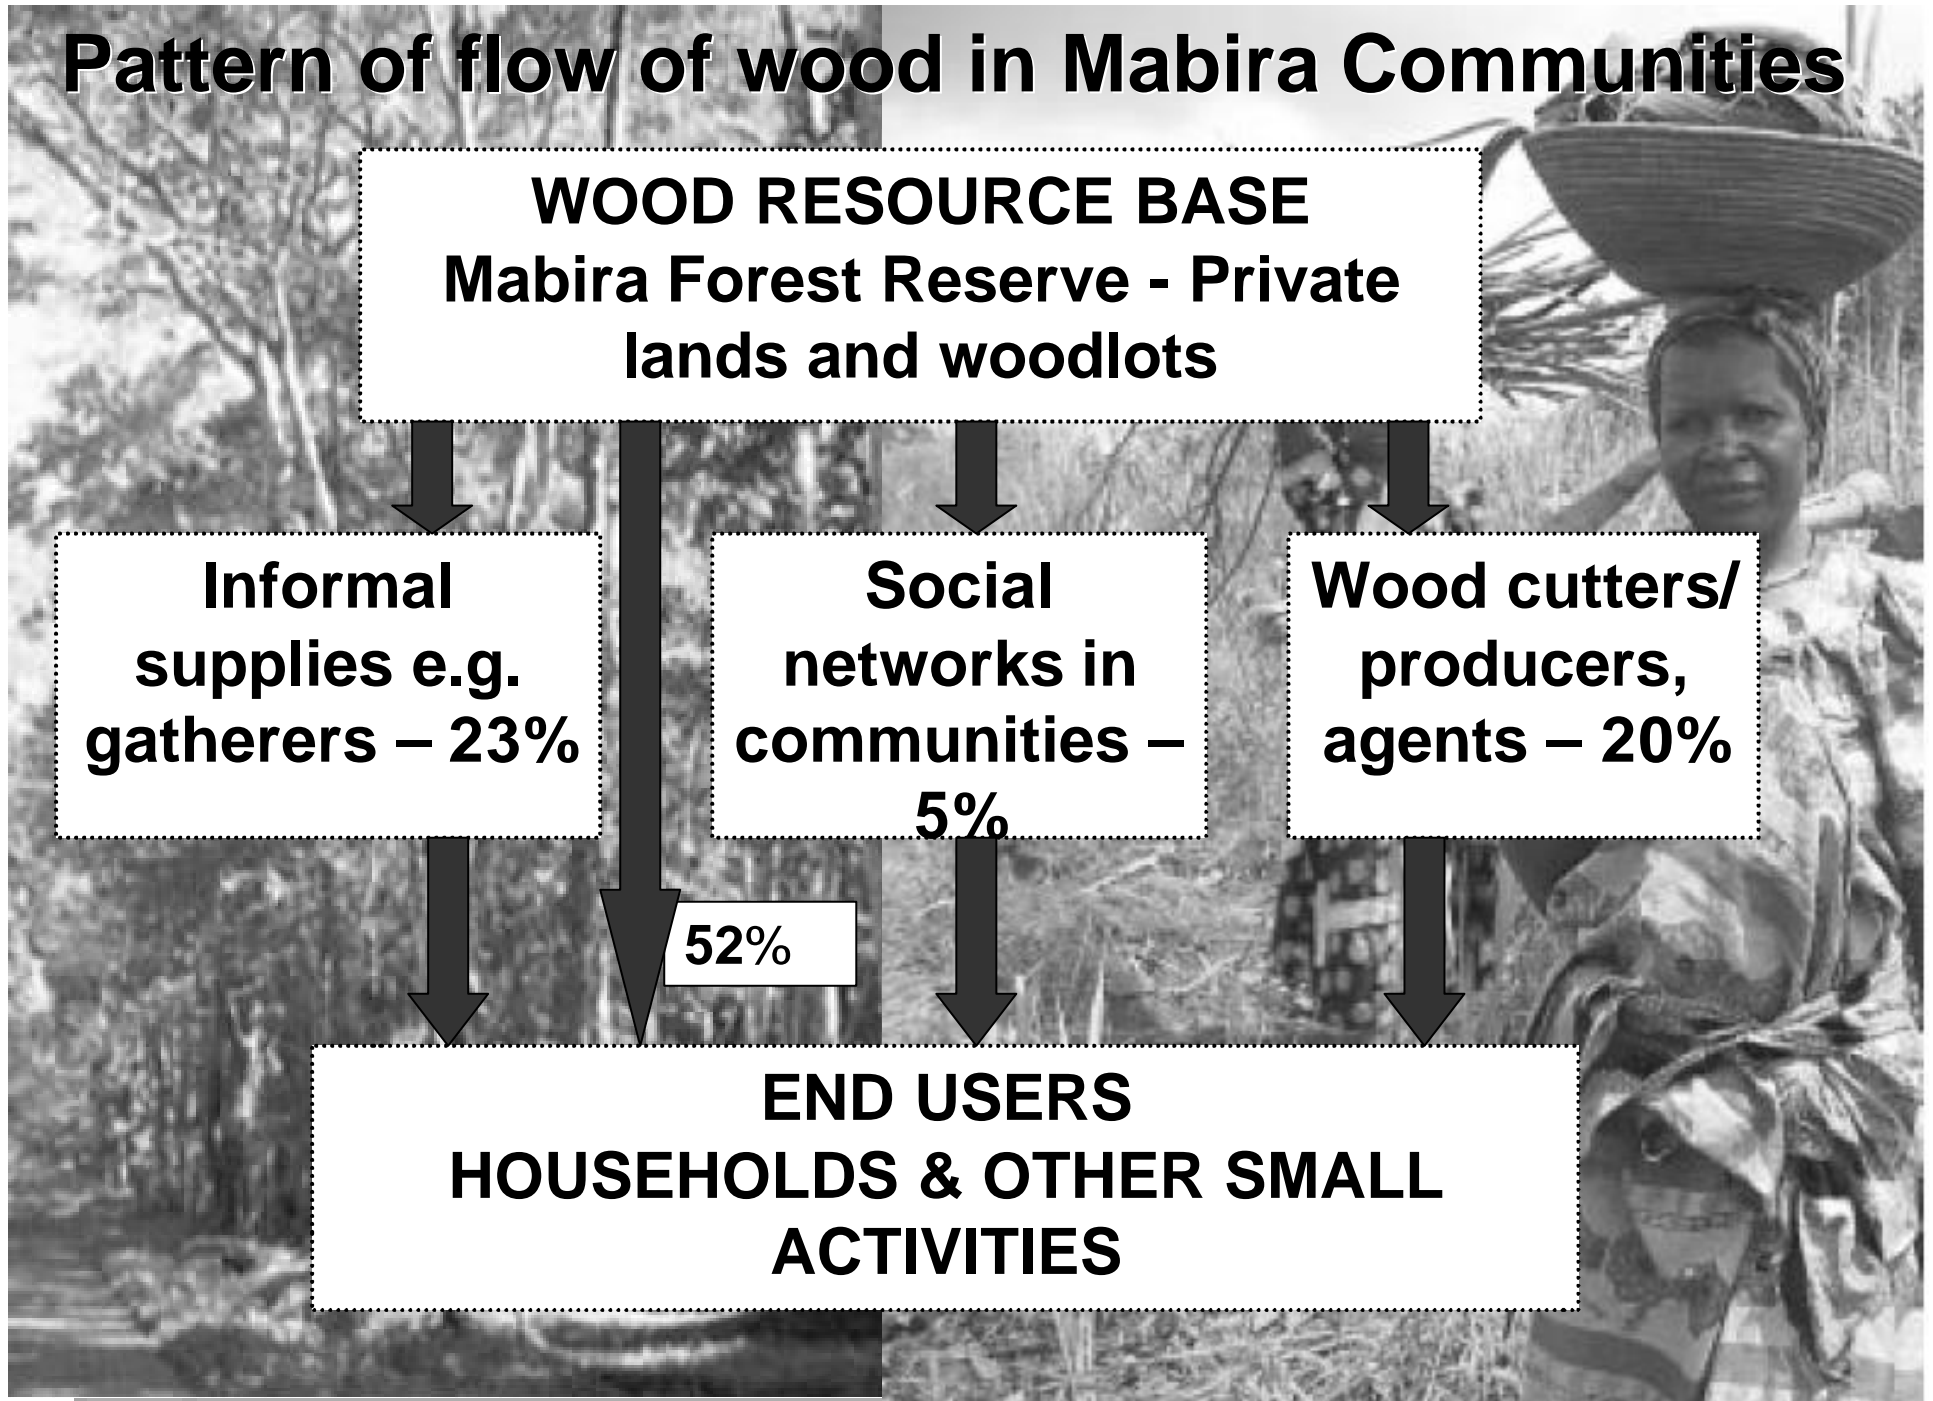

**Informal  
supplies e.g.  
gatherers – 23%**

**Social  
networks in  
communities –  
5%**

**Wood cutters/  
producers,  
agents – 20%**

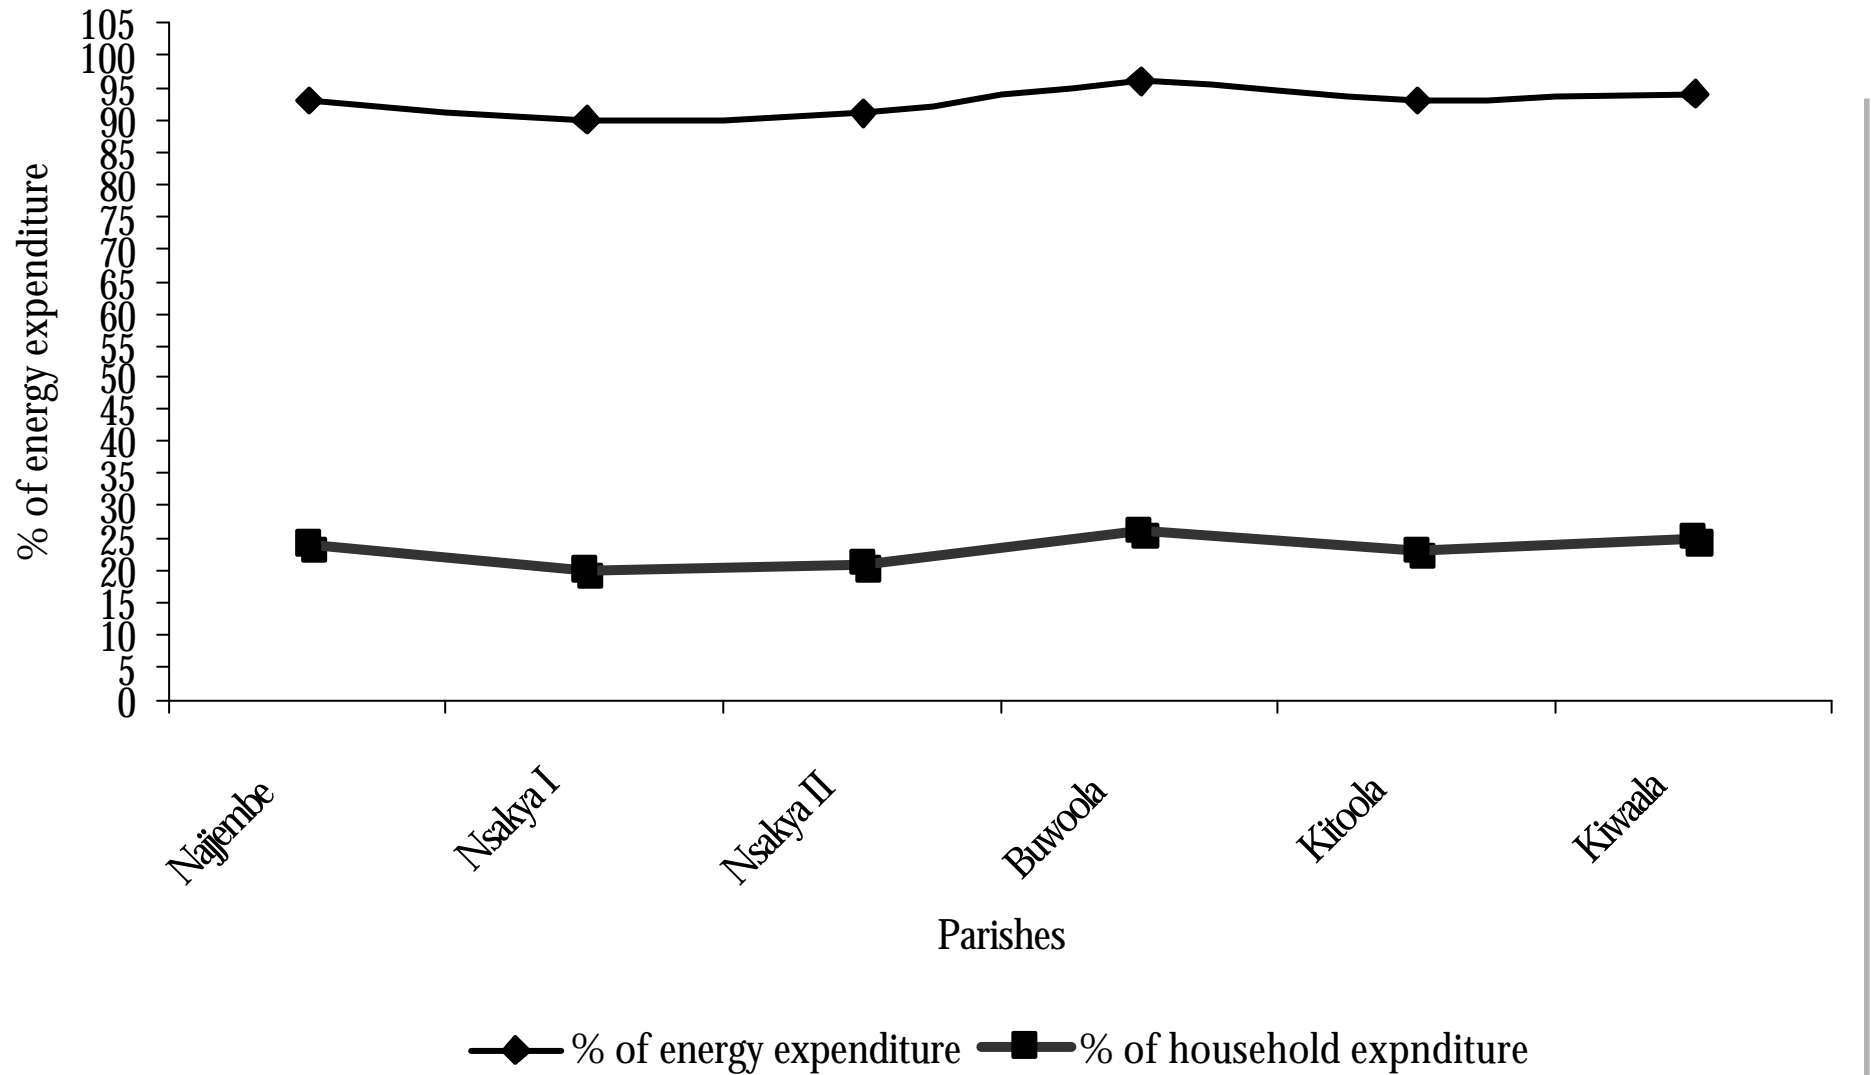

**52%**

**END USERS**  
**HOUSEHOLDS & OTHER SMALL**  
**ACTIVITIES**

Fuel /power	Technology	Fuel end uses %			
		Cooking	Lighting	Entertainment	Other activities <sup>1</sup>
Fuel wood	3 stones	76	4.2	--	38
	Improved stoves	08	--	--	--
Charcoal	Stoves	17	--	--	22
Electricity	Cookers	--	--	--	--
	Bulbs	--	13	--	--
	Others	--	--	15	--
Solar energy	Cookers	--	--	--	--
Gas	LPG stoves	--	--	--	--
Wax	Candles	--	9.3	--	--
Pressure	Pressure lamps	--	02	--	--
Paraffin	Wick - Candles	--	59	--	26
	Lanterns	--	08	--	15
	Stoves	04	--	--	--
Batteries (cells)	Torches	--	01	--	--
	Others	--	--	85	--
Others – saw dust, dung & straw, stalks weeds/leaves		04	04	--	--
Total	% Total	100	100	100	100
	N	323	332	280	210
	Missing	11	05	57	107

# Expenditure on fuel wood

# The resilience of Mabira communities

## Forcings

- ✍ **Poor collaborative management arrangements**
- ✍ **Inadequate rural electrification**
- ✍ **Low rate of diffusion of wood fuel technologies**
- ✍ **Increasing investment pressures and political maneuvers to change land use**
- ✍ **Increasing population**
- ✍ **Increasing commercialization of wood**
- ✍ **Unclear land allocation and tenure**
- ✍ **Low supply and high price of alternative energy**

## Livelihood outcomes

- ✍ **Change in fuel wood collection substitution strategies**
- ✍ **Change in type of fuel and its extraction**
- ✍ **Change in fuel using practices**
- ✍ **Enhancement of biomass supplies**
- ✍ **Change in cooking practices**
- ✍ **Increasing penetration of commercial markets**

**Increasing  
commercialization  
of wood**

# Eking a livelihood - women and children

# Signs of inadequate fuel wood

## Inefficient fuels – use of banana leaves

## Traditional cooking charcoal stoves

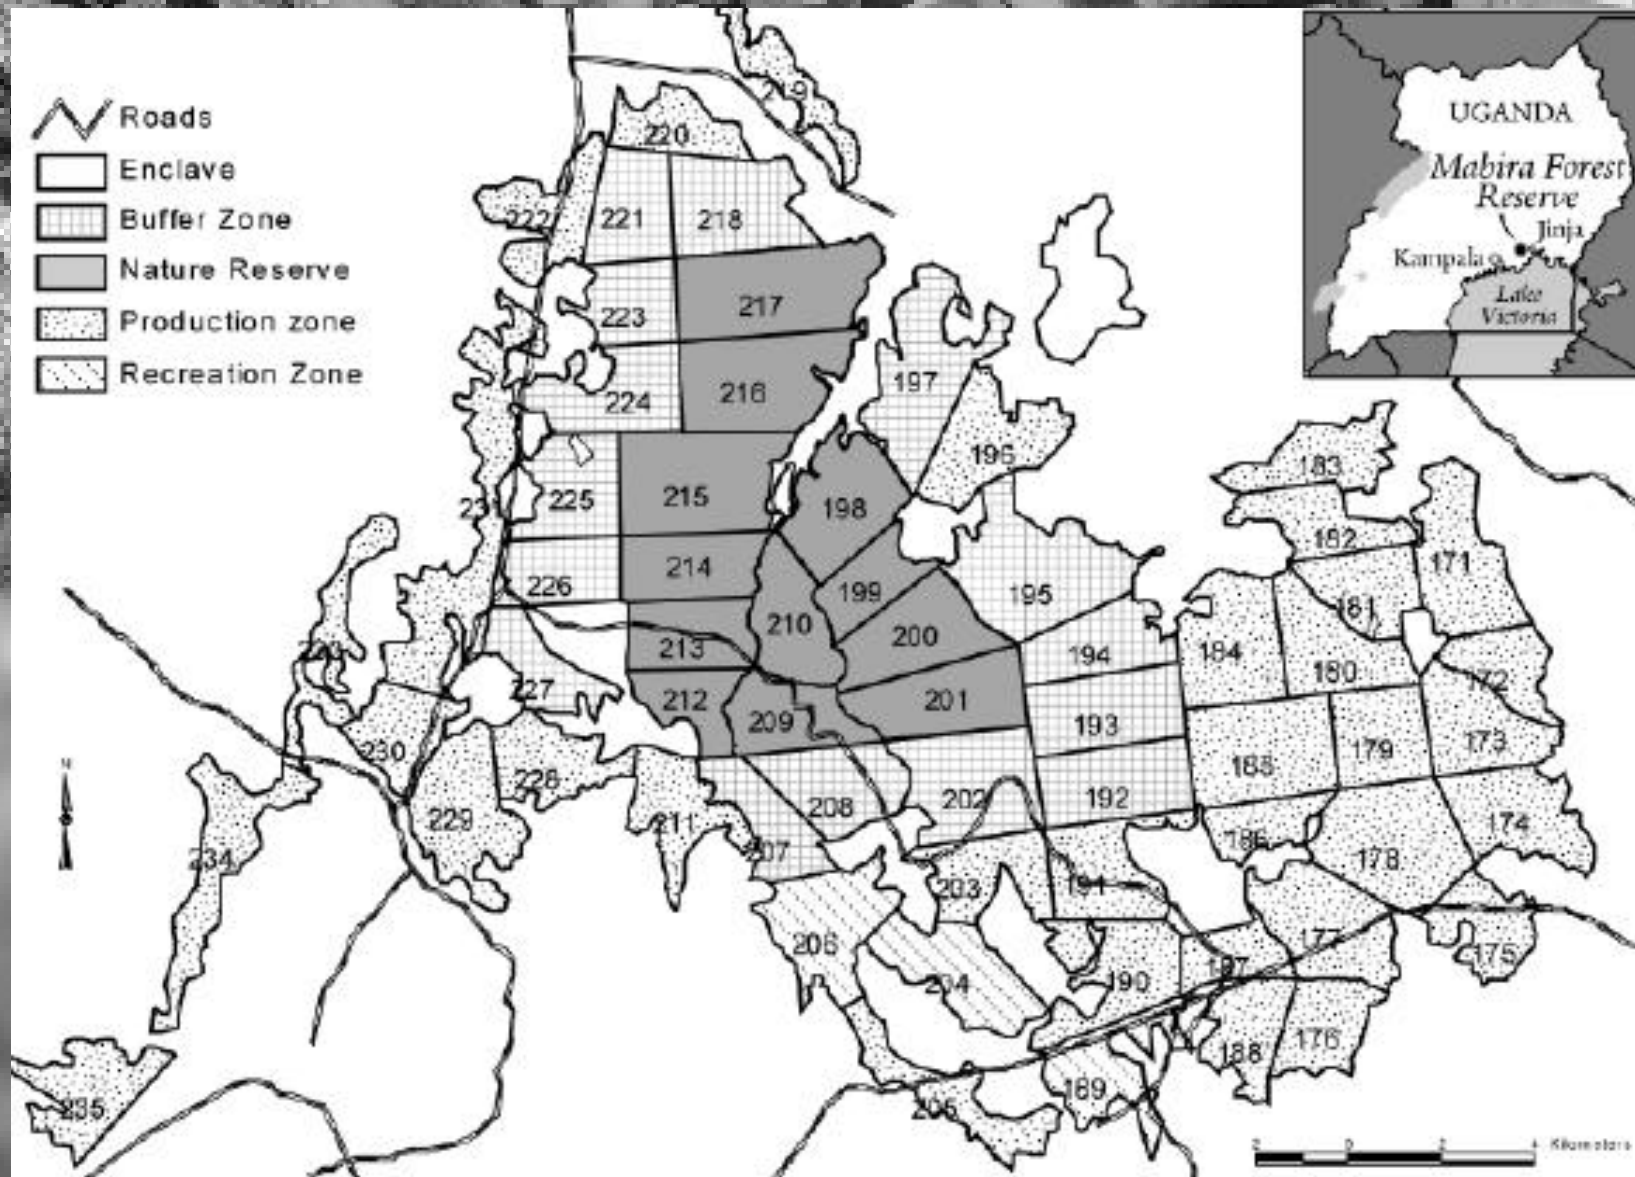

# Lesson

***“You can’t tell a person that ‘tonight you must eat your beans raw in order not to cut the tree next door’. That person will cut the tree and cook the beans.”***

*Prof. Mondo Kagonyera while launching Uganda’s Human Development Report 2005 - Linking Environment to Development: a deliberate choice*

*Richard Kavuma (2005): Poverty threatens the environment in The Weekly Observer November 10 – 16, 2005 Pg 4*

# Mabira Forest Management Plan

# Cycles/management zones in the MFMP

 **Conservation working circle**

 **Production working circle**

 **The community participation working circle – Enclave communities given 6 meters of land on the forest boundary to plant trees that would serve various purposes**

 **The recreation working circle**

 **The research working circle**

# Energy sector reforms

 **Energy Policy**

 **Poverty Eradication Action Plan (PEAP)**

 **Power Sector Strategic Plan 1997, 1999**

 **Rural Electrification Strategy and Plan  
2001**

 **Energy for Rural Transformation (ERT)**

 **Forest Policy and Forest Sector Umbrella  
Programme**

 **National Forestry and Tree Planting Bill**

# Agencies involved in Biomass initiatives

✍ **Ministries**

✍ **Institutions**

✍ **NGO's**

✍ **Community based organizations**

**Community  
tree nurseries**

# Conclusion

- ✍ Sufficient supplies of fuel wood are indispensable for the livelihoods of the rural people
- ✍ Local communities have little control in managing the forest
- ✍ Cat and mouse game between the forest department and local communities
- ✍ Appropriate policies are necessary
- ✍ Closing forests does not help – just makes life harder for local communities
- ✍ Increase access to fuel wood – reducing demand, increase supply and increase the substitution of fuels with modern fuels
